## Congresswoman Marilyn Musgrave Meets with Premier Farm Credit

Congresswoman Marilyn Musgrave recently spent some time with Premier Farm Credit Board Chairman Leland Willeke and other Farm Credit directors and personnel to discuss what's going on in agriculture, and the rural communities of northeast Colorado. Congresswoman Musgrave was particularly pleased to hear that credit quality still remains strong and delinquency rates are low. She attributed that to the resilience of those involved in production agriculture and the quality of staff analyzing and managing the loan portfolios. Another topic of interest to Congresswoman Musgrave was the effort and results the Colorado Farm Credit Associations have had in making loans to young, small and beginning farmers and ranchers. Congresswoman Musgrave pledged her continued support of agriculture and will do all she can as a legislator to improve the quality of life in rural America. ♦
